(TMI Focus, Vol. XIV, No. 3, Summer 1992)

H-PLUS® TIP OF-THE-ISSUE

H-PLUS De-Tox: Body *(P)*
Function Command: PLUS-CLEAN, CLEAR

A member of the Institute's Professional Division reacts to bee and wasp stings with disorientation, rapid heart rate, swelling, and itching. Unfortunately, the epinephrine which relieves such symptoms also affects him negatively. When a sting occurred, he remembered that *De-Tox: Body* works to cleanse the body of toxins and used PLUS-CLEAN, CLEAR (together with PLUS-RELAX, RELAX). Itching and swelling were extremely mild and all reaction subsided in one to two hours. Keep *De-Tox: Body* in mind as insect season approaches—as a backup to medication, if you are caught without medication, or if you react badly to antihistamine. A TMI staff member receives relief from mosquito bites and wasp stings with *Tune-Up*—she places her hand(s) on the affected area(s) and repeats the Command several times.

* Remember, *De-Tox: Body* is a permanently installed Function whose effects are enhanced by repetition of the Function Command.
